

OWA Consults

Educational Software	Teacher Training	Historical Preservation	Oral History
----------------------	------------------	-------------------------	--------------

Educational Software: OWA works with school systems to develop customized software in the areas of social studies and language arts. The software we customize for your school features your students, their parents, your teachers and administrators. Click [HERE](#) to start our conversation about how we can build your customized software.

Teacher Training: Our training is based on the assumption that your teachers are brilliant. Thus, our training is intended to put teachers in touch with those aspects of their talent/personality that is the basis of that brilliance. To accomplish this we use a customized action research technique. Click [HERE](#) to start our conversation about how we can assist your teachers in building capacity.

Historical Preservation: OWA assists community groups and organizations to prepare applications to have buildings and communities placed on the historical register. Click [HERE](#) to start our conversation about how we can assist your organization or community in being placed on the historical register.

Oral History: OWA trains organizations, families and individuals in the techniques required for conducting effective Oral History interviews. Click [HERE](#) to start our conversation about how OWA can assist your organization, family or you in learning the techniques to conduct effective Oral History interviews.
